Dear Clare,

Greetings from St. Francis Hospital Buluba.

Am so glad to learn that the trustees have decided and authorized other money amounting to £ 2,000 for Managing COVID 19 pandemic in Buluba Hospital. We are grateful for this offer of the additional money to manage Covid. With this amount of money, we expect to do a lot to protect our health workers from contracting the disease and also change the life of our Covid 19 patients. In this wave, we have been vaccinating for covid, treating patients from the Outpatient department, and admitting COVID patients with serious conditions.

The situation in Uganda is not good, many people are no longer working, many have lost their jobs, children are growing from homes without going to Schools, businesses are really collapsing and the cost of living is becoming too expensive. As a Hospital, we are designing a Hospital web-site, hopefully by the end of July it will be ready, we shall open up a Facebook and Twitter accounts then we shall be able to tag the information concerning leprosy guild there. Once again thank you very much for the total amount of £4,000 donated for Managing the leprosy patients and protecting our staff from Covid-19. God bless you always.

Below is how we are expecting to utilize the COVID -19 grant.

Sn	Activity	Inputs	Outputs	MoV	Amount (Ug. Shs)	Amount (Dollars)
